ADVERTENCIA

The cords blind can pose strangulation hazard to children, babies and pets. To avoid accidents, adjust the cord with hooks or brackets and keep out of reach of children.

Instalación PVC 25mm Mini Blind

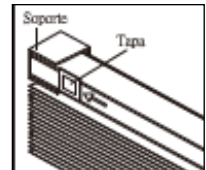

- Define the location of the brackets.
- Align the brackets with a pencil and mark the point where to drill with drill
- Attach the brackets using the screws provided. You can use ramplug.

If the center support is included, place it in the center between both ends of the head rail.

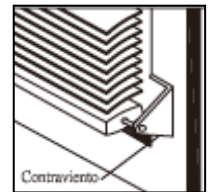

- Insert the headrail into the brackets
- Slide the cap to lock the headrail at both ends
- Make sure that the blind is well secured to the brackets

- Place the Bottom rail Bra to the wall with the included screws and secure the Bottom rail of the blind.

Keep inserted the bottom rail of the blind into Bra While you do not need to raise the blind, or you have the window open. This will prevent damage to the blind due to the movement caused by windage.

Operate the blind

Before raising or lowering the blind, turn the cane until all the slats are open.

- To lower the blind, take the cable and pull it to the left at the required height.
- Reposition the cable in the vertical position, activating the brake to maintain the blind at the desired height.
- To lift the blind, pull the cable to the right.
